SKU: PCUBE1D1C300L

Product Features

- Robust all steel construction
- Durable powder coat finish
- Pre-drilled for nesting
- Sloping tops are available
- Carbon Zero manufacture
- Various Lock Options
- 13 Door Colours and 3 Carcass Colours

PRODUCT DESCRIPTION

This exciting range of new modular lockers from Pure are designed to help you maximise storage in the smallest of spaces. The carcasses of the lockers can be any one of three different colours, while the doors can be any one of thirteen different hues.

Pure has developed a manufacturing technique that is carbon zero in an effort to reduce their impact on the environment and contribute to the preservation of our world. Optional extras include sloping tops, which are great for preventing people from putting things on top of your lockers, locker stands, stands with bench seating, and master keys, which are great for security purposes and when keys are lost. Lockers should always be secured to a wall for security and safety.

PRODUCT SPECIFICATION

LOCK DETAILS

Lock Image	Lock Type	Lock Description
	CAM Lock Inc. 2 Keys	The CAM Lock is the preferred choice. Each compartments is opened using a key. Each lock comes with 2 keys included. Extra or replacement keys are available at an additional cost.
	Security Padlock Fitting (No Padlock Supplied)	Upgrade your locker security with this advanced hasp, combining heightened protection and a touch of elegance.
	Diamond Handle Padlock Fitting (No Padlock Supplied)	This modern hasp accommodates padlocks with a shank diameter of 5mm to 7mm (padlock sold separately).
	Premium CAM Lock Inc. 2 Keys	Our premium cam lock boasts double-entry key access, providing an elevated level of security.
	Mechanical Combination Lock (Private)	Designed for specified users, this 4-wheel mechanical combination lock in private mode offers up to 10,000 unique combinations. Private mode means the code can only be reset using a master key.

Lock Image	Lock Type	Lock Description
	Mechanical Combination Lock (Public)	In public mode, this 4-wheel mechanical combination lock mirrors the specifications, with the added feature that the code auto-scrambles after each use, creating 'hot' lockers. If a user forgets their code, it can be reset using a code-finding master key for added convenience and security.
	Digital Combination Lock	The Zenith digital combination lock, featuring a robust zinc alloy housing, a 10-digit keypad, and a secure key override as standard, is the ideal choice for diverse applications.
	RFID Touchless Lock	Crafted from high-strength Grivity for robustness, the RFID touchless lock can be used independently or integrated with existing wireless systems. It includes a steel override key for immediate supervisory access by bypassing the contactless locking feature when needed.
	Coin Return Lock	User-friendly, the coin return lock operates by inserting a pound coin, which is then returned to the user when the locker door is opened. Additionally, it can be opened with a master key if needed.
	Token Return Lock	Simple and convenient, the token return lock operates by inserting a plastic token, which is then returned when the locker door is opened. It can also be opened with a master key if necessary. Please note that tokens are not included with the locks as standard but can be supplied separately.
	Coin Retain Lock	The coin retain lock operates when the user inserts a pound coin, which is retained and not returned when the locker door is opened. This straightforward revenue-generating system can be a valuable additional income stream for venues.

PRODUCT Q&A

Why choose Pure Lockers?

As of 2024, Pure Lockers stands as the sole carbon-neutral locker manufacturer in the UK. Beyond their eco-friendly credentials, these lockers exude modern aesthetics and offer a myriad of configurations and add-ons, allowing you to craft your ideal locker design.

Where are Pure Lockers manufactured?

Pure Lockers are the UK's leading locker manufacturers. All of their steel lockers are carbon zero and manufactured in the UK out of their 64,000 square foot factory in Deeside.
